Paul: came in on the Executive Pay Bill matter and said that he had rewritten the letter which the Director had approved in order to conform to Roger Jones' ideas of the Bureau of the Budget. I approved the changes and he took it over to Jones; Jones called back later in the day to say that the changes and the letter were completely unacceptable to the Bureau of the Budget and the Civil Service Commission. I advised the DCI of this and he agreed to talk over the matter with Sherman Adams. Mr. Paul took the necessary support material to the DCI for this conversation.

Meeting with Hull and Lovett of the President's Board.

~~TOP SECRET~~

~~TOP SECRET~~

24 April 1956

CASSIDY: reported he thought the briefings were well received. He said he thought Lovett and Hull would recommend that National Intelligence objectives be placed in an NSCID rather than a DCID so they would have to receive NSC and Presidential approval. He also said they were still in an exploratory stage as to method of procedure and mentioned that they had sent the President a report which had been acknowledged by the President with apparently an unsympathetic reaction from the President as to any delimitation. Cassidy said he thought the Board or Dr. Killian would want to sit down with the President on this subject.

25X1

[redacted] said he would write a report on the briefing he and Kent gave Hull and Lovett. Said they covered use of operational information and its potential use in wartime, as well as national intelligence objectives.

25X1

[redacted] called to complain about Grogan's objection to his using the title "Intelligence Unmasked" and his requirement that the speech be written out. I pointed out that we were in basic violation of NSCID 12, and that I didn't intend to get in the middle - he and Grogan should take their fight to the DCI.

25X1

[redacted] OTR: came in to get details on the memo requested for the President's Board on conflicts in training. He also said OTR had carefully reviewed and guided General Platt and that he had refused to follow suggestions, so he didn't feel any obligation rested with OTR for further action.

25X1

PAPICH: called on [redacted] Said I would have [redacted] call him and see P. tomorrow.

25X1

25X1

[redacted]: said he would make suggested amendment on [redacted] opinion and return it to [redacted] and myself for concurrence.

25X1

25X1

[redacted] said the DCI wanted me to prepare something on "scholarships" for CIA employees.

Lunch with Baird who told me about his three-month trip. He feels that we are wasting a lot of money and manpower training so-called agents. He found that two out of three persons abroad would prefer to have directed assignments - if they were certain these would be arrived at objectively.

CASSIDY: said Kennedy would probably go to [] with Pat Coyne at the suggestion of Doolittle. 25X1

Meeting of Building Steering Committee in R&S Building to see functional layout of organization in the new building. (0910-1130)

CASSIDY: said probably only 5 members of the President's Board would be here May 12 - and they would not necessarily want us to appear - although he would like an outline of the subjects they have laid out for themselves and to have those experts stand by.

WISNER: at my request, gave the following information on his lunch with Lovett yesterday: he expressed concern over the broad charter of the Board; he felt that the Mansfield bill did not completely end the question of Congressional supervision and that we should get more active scrutiny by Congress; he was interested in the Philby case and possible penetration of CIA; he listened to Wisner's worries about Kennedy, but apparently didn't advise any action.

25X1 WISNER: expressed great concern about Kennedy, and I asked him to give [] guidance for the briefing which he said he would do.

Wednesday, 2 May 1956

Told the DCI I was extremely concerned because [redacted] has been reprimanded - in fact, nearly court-martialled - for being frank in their presentation to Ambassador Kennedy. Said that I had not been present for the entire briefing, but that I did not see how the briefors could be criticized for fully and frankly answering questions and that Mr. Kennedy had described the briefing as "excellent." Further, I said that Mr. Wisner had discussed the briefing with me two days before, and I had specifically asked him if he would advise [redacted] and he said he would. The DCI said he planned to talk to Killian about Lovett doing the DD/P area, that it wouldn't be good if Kennedy were the only one who covered the clandestine services as he was getting old and crochety and had some very fixed views. He said he had told Wisner that he thought a lot of his views about Kennedy were personal dislike, to which Wisner agreed. He said that he thought [redacted] had perhaps been too low an echelon to give the briefing, and that he would talk to [redacted] about it.

25X1

Advised Wisner that the Board might wish to be briefed on May 12 on Plans, Organization and Operations.

Advised SHELDON that the Board might want to be briefed on May 12 on DDI organization and research operations.

Advised WHITE the Board might want to be briefed on May 12 on DDS organization, Personnel, Budget & Fiscal, Training & Education, and Security.

GROGAN: called about a Collier's inquiry that the DCI had given the President's favorite book to all his associates - said I didn't know anything about it. Met with [redacted] to discuss intelligence studies inasmuch as they are meeting on it at [redacted] on 13 and 14 July. I made 25X1 the following points:

1. that in case of disagreement by the Editorial Board, the decision of the Editorial Chairman, Dr. Kent, should be final;
2. that the publication should be classified SECRET, otherwise it would fail in its mission;
3. that some attempt should be made to include the IAC on at least an honorary basis;
4. that the first issue should not necessarily be linked to the 10th anniversary of the Agency but should strive for perfection and to come out later if necessary;
5. that for political reasons they should not worry too much about contributions from Donovan and Truman;
6. that I would endeavor to get the DCI to sign the Forward and did not believe a Notice or Regulation necessary.

WHITE called to warn me that the State Dept. had cancelled TRANSFER ALLOWANCES as of 1 May and that we had followed suit and that I would probably get complaints on it.

The DCI said that he was asked the question by DR. KILLIAN as to whether there was any coordination on communications in the intelligence field. Told him I would check it and prepare a reply.

He also is concerned about the progress report to the Board in September, and I suggested that he pay particular attention to getting some coordination on substantive matters and that there also be careful staff work by [redacted] on 5412.

5. I mentioned to him the appeal of [redacted] and he suggested I hand 25X1 the papers on this matter to GEN. CABELL. He also expressed considerable concern over the number of individuals in the Agency who weren't fully employed. I said we would have a list to GEN. CABELL by early next week.

Discussed with MR. AMORY the DD/I survey and advised him we wouldn't complete it until after my return, but that my tentative conclusion was that his office was run well but that he needed a full-time Deputy and that I was very dubious about the value of SRS.

[redacted] came over to discuss the taking on of the LEGISLATIVE COUNSEL job and I assured him that I was very happy to have the job taken on by himself and the function transferred to the Office of General Counsel. I mentioned the fact that the DIRECTOR had advised me in [redacted] that he wanted the LEGISLATIVE COUNSEL in most instances to report to me and to see him on only matters of policy where he should be concerned. [redacted] said this should be thoroughly discussed because he thought that COL. WHITE felt differently. I said I thought the way to handle it was for WHITE, HOUSTON, [redacted] and myself to sit down and work out the details prior to the DIRECTOR's return. [redacted] then went on to say that he felt that some changes in the secretarial help for the LC might be in order and that he did not feel there was enough work for the two present girls, plus his own staff. He said that [redacted] on his own had worked out the arrangements with GEORGE CAREY of [redacted] and that at one point PFORZHEIMER had come to him and asked permission to go to CARELL to try to get [redacted] appointed as AD/CR and himself, PFORZHEIMER, as DAD/CR. AMORY also said he, himself, had been considered for Assistant Sec'y of State for Policy and Planning but that because Walter ROBERTSON advised the Secretary of his views on the Far East, he had been turned down. Finally, he advised that his area had been cut by 68 jobs and that he had been determined to abolish the Senior Research Staff. 25X1

CASSIDY stayed to talk about various items concerning the President's Board. He said that WARREN UNNA of the WASHINGTON POST had been in to talk about CIA and that he was doing an article for the October issue of HARPERS on CIA and mentioned the following items of interest--that there seemed to be some friction between the FBI and CIA, and considerable friction between the military and CIA. UNNA is tying his article to the MANSFIELD BILL. CASSIDY mentioned that in working the OCR he discovered that the lists of material available put out by OCR were inaccurate and that people receiving them often went elsewhere to get the material because they felt they could get it quicker than by going to OCR. He also said that he had discovered that there was a common tendency to put out new requirements rather than try to dig the existing material out of the files. CASSIDY also mentioned that GEN. CUTLER had sent the Agency a new communication on the subject of Executive Director and that the Board was extremely interested in this subject and did not understand why the DCI was not more responsive. He said that MR. LOVETT had discussed this matter with the DCI just before he had left for [redacted] and felt that he had succeeded in persuading the Director to a certain degree. CASSIDY also mentioned that he had recently been making a survey of the consumers of intelligence production and had talked to Assistant Secretary of Defense SPRAGUE who had expressed not a very high regard for intelligence products. CASSIDY said that GODEL had gone to NSA and had been replaced by [redacted] and that [redacted] had told CASSIDY that he felt there was insufficient staffing of CIA operations in Washington. 25X1

LUNCH with WHITE who advised me that CASSIDY had told him that DOOLITTLE was considerably upset with the Agency because rather than reducing in size, as his group had recommended, it had continued to get larger and that DOOLITTLE felt that the Agency had ignored many of his recommendations. WHITE commented that he felt that this meant that the Agency had fewer and fewer friends on the outside.

25X1 [redacted] I told him that I planned to review the case thoroughly and would keep him informed.

25X1 [redacted] came up to ask if I would participate in a presentation to the NATIONAL WAR COLLEGE on 9 September and talk for 45 minutes on the organization and functions and mission of the CIA.

He believes that a periodic briefing by somebody in the DD/P on what happens to this material would be of great use. He believes there has been little change in the current intelligence picture although our publications are better. He says that 80% of the CIB is duplicative of the DIPSUM and State cables which are used to brief the Secretary. ARMSTRONG suggests that maybe we should stop sending it to those agencies where it duplicates their material. We discussed the possibility of a joint current intelligence effort and he pointed out that for a period after the war, before SPS was transferred from the Pentagon to State, there was a joint current intelligence effort in the Pentagon. ARMSTRONG believes that the delineation of effort between ORR and STATE has worked out very well and that there is less suspicion on the analysts' level. [Redacted]

IG Staff meeting at which I discussed the general leakage from the Agency at some length and commented that I felt a large amount of this was coming from misguided employees who felt they were assisting the Agency, but who were only doing it damage. I urged that the Staff in their contacts with employees of the Agency point out to them the many channels of appeal, including that to the President's Board, and urge that employees keep their appeals in Agency channels until all recourse was exhausted. I stressed the fact that I felt that if this kept up and that a joint Congressional committee was established the days of CIA might well be numbered.

In addition, an ad hoc committee on communications was established and this group was unanimous in feeling that a national network was needed with one center and one czar and electrical dissemination to all customers. This would require a red line system with override authorities from collection centers and would represent a contribution of facilities. The communicators felt that the three major areas to be studied were those of the recognition of significant intelligence; physical assets; and processing. Communicators also believed that four principles needed to be established: (1) that early warning traffic be identified by the intelligence community; (2) that the geographic area of sources be identified; (3) that there be one addressee in Washington and (4) that one senior intelligence officer be responsible for the entire mechanism.

(2) No opportunity in CIA.

(3) No effort to correct problems in Agency--no unit to generate improvements from within the Agency.

a. Criticizes DD/I activities.

b. " debriefings.

c. Little field cover for DD/I.

5. Improve Scientific Operations Branch:

a. More delegation of authority.

b. Availability of branch chief.

c. More personnel.

d. Elimination of paperwork.

e. Improvement of files.

I told him that he was talking about things which he didn't know about in many instances and that he was most unfair to ELOISE PAGE and furthermore, that if we allowed subordinates to evaluate supervisors in all instances, we would have a form of Communistic anarchy. I suggested that he would probably run into frustrations in other forms of endeavor and pointed out that he had no idea of how many improvements were used to make the Agency better.

25X1

[redacted] said that [redacted] called collect and was told she could not accept the charges so the call came through prepaid. She told him the Director had the problem under consideration and would be in touch with [redacted] shortly; he asked if she would drop him a line then and she told him she would try to (he asked when the Director would be in touch with him and she told him she hoped within a few days). He also mentioned that he had not gotten a Rockefeller award and that this was a factor. I told him that I didn't think he should be too deeply concerned that he was not chosen to be Deputy Assistant Director of OCR, that there were other jobs in the Agency he could do and that he was very highly regarded in the Agency. I did point out, on the other hand, that he might have to be content to stay fairly much in position for several years ahead.

Met with the Director to discuss the FEC and [redacted] matters. I advised him that FULTON LEWIS spent yesterday and the previous day in the Defense Department, probably discussing the [redacted] matters with G-1 personnel [redacted]. He asked if I would be sure to keep [redacted] advised of these [redacted] particular matters. I said that I would. He also asked that I make sure that the [redacted] office picks up the material from [redacted] at his home on Monday. I advised him that IO, Security and my staff were each independently reviewing the FULTON LEWIS material and he asked that when this was completed, I provide [redacted] with a memo on it. He then gave me several papers and memoranda as a result of the trip to [redacted] and stated that [redacted] was quite anxious to reply to the attacks and that he and [redacted] would be seeing FULTON LEWIS the latter part of next week.

I reviewed for the Director fully the genesis of the [redacted] story and recommended that he call GEN. GOODPASTER and advise him that we had completed our investigation and that he would be in a position Monday to show him our report. He placed a call for GEN. GOODPASTER.

I asked the Director if he remembered who talked to him about [redacted].

I told him that 90% of our people thought the Agency was too big and recommended that either the Career Council or PRC be given responsibility for dealing with the problem.

HAL LAWRENCE called concerning the JACK RAYMOND story in the New York Times and said that Dr. KILLIAN and Mr. DEARBORN were considerably disturbed about this and asked if we could check as to the possible source. I advised the DCI and he stated that he had already received a call from Gen. GOODPASTER on it. I also checked with AMORY whose view was that it must have come out of the Pentagon. I advised CASSIDY of this who stated that he had been in HUGH CUMMINGS' office and had heard WILKINSON ask COMINGS whether this shouldn't be deliberately leaked to the press. I advised the DCI of this and he reported that he was meeting with Gen. GOODPASTER on this subject and that they felt that COYNE should coordinate an Agency-wide investigation.

GROGAN later reported that INS had advised him that the story had been confirmed by them the night before in the State Department. He later advised that the press was now attributing the story to government intelligence. SHELDON advised that the DDCI at USCIB had instructed each agency to conduct its own investigation. LAWRENCE called back later and said he would not come over this afternoon and implied that because I had mentioned it to CASSIDY, it would have to be worked out on a KILLIAN to DCI level.

The persistent rumors, particularly overseas, that the DCI was about to retire. He said he had urged [REDACTED] to get the Director to issue a statement on this. 25X1

I said that when an individual first came to them and they decided that it would be a case, they should ask their secretary to get a case number from this office so that the name could be recorded, but that their secretary should maintain the case file until the case was closed. I pointed out that there were several categories of cases, namely perennial cases about which we notified General Counsel, Security and Personnel each month; additional items on old cases; and new cases. I said that I hoped that they would use the quarterly report as an incentive to close out their cases, particularly if they had been continuing for some time. [redacted] was extremely angry that he was going to be deprived of \$100 because he was not a member of career service. I pointed out that I had participated in forming the regulation which said non members of the Career Staff would not receive language awards. He went on to say that SEN. LANGER wanted a thorough investigation made of the Agency and he thought this was a good thing. I said he was entitled to his opinion but that the pertinent issue at the moment was to answer his question as to why he was not a member of the Career Staff and that when we had closed that bridge we could discuss other matters. He said he had assumed that when he did not get Career Staff status, they were trying to get rid of him. I indicated that this was probably correct.

He has handed the chieftanship to [redacted], has another doctor 25X1 coming into the Division later this winter who trained at Cornell Medical Center in New York. He is in the process of analyzing the three principal roles of the Psychiatric Division, namely selection, clinical, and operational. He is going to set up a card file so that some experience graph can be developed.

We discussed whether Photo Intelligence should be on our charts and agreed this was a likely subject for discussion at the staff meeting. Finally, we reviewed in some detail the case of [redacted] and he agreed to turn down the appeal. He also suggested that in the future I personally review all selection out cases with him.

25X1

[redacted] called and I told him that I had discussed the case with GEN. CABELL and that after careful and deliberate consideration it had been regretfully decided that he would have to leave the Agency. I told him however that I would talk to the Personnel Office and attempt to insure that he was put in the most favorable possible light when inquiries were received from other agencies.

25X1

[redacted] came up and brought a file of [redacted] papers that had come 25X1 from State. He also said that [redacted] was abroad and that he would be back in October at which time I could talk to him about his claim against [redacted] 25X1

25X1

[redacted] called and said that they had finally caught up with [redacted] 25X1
but that he did not have very much to offer.

25X1

[redacted] came in and said that she had two questions: first, was there anything in her record that might preclude her being rehired. I told her that the problem had primarily concerned her husband and that it had been a matter of conduct rather than security and that as far as being rehired was concerned, if her conduct was satisfactory her work record was sufficiently good so that she would have no problem being rehired. Her second question concerned a possible transfer to [redacted] I said that this would depend on the time that this occurred and where [redacted] they would be located. I said that after passage of several years the people involved might very well not even be in [redacted] any more and 25X1 that there would be no problem.

25X1

At the deputies meeting discussed the question of putting a photo intelligence center indication on the charts of the Agency used to brief outsiders. After general discussion of this, GEN. CABELL ruled that it was all right to put them on the charts. I also advised the deputies of the problem with [redacted] and said 25X1 that he might well try to come into the Agency through any media. Also GEN. CABELL [redacted]

I told her that I wanted to make it very clear to her that whereas I would advise him that she was in a part of the Agency where service overseas was required and that we would appreciate his not placing obstacles in the way of her going overseas, that beyond that the Agency will do nothing further as this was a matter between them.

25X1

[redacted] called to say that he and DR. TIETJEN had reached an
impasse on the DD/I project. He said that he had been asked for an interim
report in July which he supplied but had never heard any comment on until he
called to ask about it two weeks ago when he was told that another report was due
September 15. He asked to see DR. TIETJEN but TIETJEN said he would see
him only after he talked with [redacted] I asked him what his work with this
group showed and he said while it was incomplete and they planned to meet 3 or 4
times this Fall, it tended to confirm some of the stresses that had been noted
among Agency personnel, particularly in regard to the effect of working in a security
agency on personal lives. There seemed to be a strong feeling indicated that
there was a variability of security requirements and people felt they never really
knew what security would want under certain conditions. [redacted] said his group 25X1
started out with 12 or 13 but ended up with 10 in the senior grades in ORR. I
thanked him for calling and said I would look into it.

It seems that at 12:30 Monday morning a folder had been discovered in his office and that he was held responsible for all of the material in the room. He had not been in the office since 3:30 Friday afternoon and there are several safes in the place to which at least 7 people have the combination. I told him that under these conditions he should appeal the responsibility because the guards were supposed to check the room several times each day and that there was obviously a chance that others might have left the folders out. He did not wish my intervention at the time and said he would follow my advice.

25X1 Talked to both [redacted] and WHITE concerning the letters for the American

25X1 holding them because [redacted] thought the Director would want to sign them.
I told them both I thought this was a case which the Director should not sign them
and urged they be released for BAIRD's signature. WHITE later saw me at PRC
and said he had shown the letter and list to GEN. CABELL who refused to have
anything to do with it whatsoever and said they should be held for the Director's
return.

Attended PRC meeting at which we agreed to double up the program review
next year and meet from 3:30 to 5:00 on Thursdays. We also agreed to have
individual sessions with DD/I and DD/S to review their annual programs. DD/I

HULL that if the President asked about this particular statement they would be hardpressed to justify it. He said that he thought it should be recognized that what the Board had said in effect in this report without putting it in so many words was that CIA lacked leadership and that he thought that anybody with a reasonably open mind reading this report would recognize that they said this. He said that it was fairly obvious to him that either somebody was paying no attention to the Inspector General reports or that these were erroneous; that the Board did not feel they were erroneous.

He expressed great unhappiness with the way things were going and said that he felt WHITE was not very interested in Congressional relations; that he had been left out of the Budget hearings; that the reason we missed on the training bill was because it had been referred to the Comptroller's Office, and that he had not even heard about it until it was too late; and that most of the ideas that he had proposed met with a negative, if not hostile response. I told him I would try to discuss this with the Director next time I found him in a reflective mood.

TOP SECRET

DIRECTORS' MEETING, 10 November 1958

Meeting started at 0915 in order to permit the DCI to keep a 1000 appointment in the White House.

The Director opened the meeting with a discussion of the TSS supplementary appropriation request of [redacted] which was approved by PRC some time ago. He said he was uneasy about TSS and questioned the desirability of having it appropriate funds for stockpiling. He was of the opinion that this was a poor practice since the users had no responsibility for it and therefore TSS could be placed in the position of acquiring equipment on its own authority which might never be used. This was debated by HELMS and BISSELL without effective result. BISSELL admitted he had not yet taken over the management of TSS and had not thoroughly reviewed its R&D program. The DCI wanted to know what the Agency had to show for approximately [redacted] spent by TSS in 25X1 R&D over the past five years. BISSELL and HELMS are to try to find out and discuss further with the DCI.

This led to a more general discussion of the results of the BOB meeting last Friday. Apparently it was a most unsatisfactory meeting without concrete results. The net was that the Agency would be expected to take a cut of [redacted]

A sour note was struck in the outcome of a private session between the DCI and SAMS. The Director said he made no commitments but according to MACY, SAMS was under the impression the DCI had agreed to substantial cuts. The Director announced his intention to speak to SAMS further.

There followed general discussion of some operational matters and the DCI left a few minutes before 1000.

A rump session took place with WHITE bringing up the matter of the budget again with some added comments on the Friday meeting. He also told of his conversation with the DCI on reduction of personnel. He said the Director was most positive on this score but would not commit himself to a specific objective. He does not want to order a percentage cut and won't decide on how much of a reduction he wants to achieve. WHITE took the position that there was a choice of only two methods; the arbitrary percentage cut (he spoke in terms of 2 per cent), or the manpower task force to study the situation and recommend ways of reducing the rolls. Another subject that was brought up at this session had to do with the speed up of communications to increase the flow of intelligence information from the Field. Both HELMS and SHELDON agreed that what was first needed was a better method of screening the flow so that material of little or no significance could be eliminated before dissemination. Apparently there is a committee for this problem also

[redacted] at 25X1
on

25X1

it was agreed that [] would be offered up as chairman in the initial stages of consideration of the substantive problem and [] would become chairman when the technical or physical stages were reached.

25X1

NOTE: One aspect of the DCI's method of handling these meetings disturbs me considerably. The subject of the TSS supplementary appropriation was brought up out of the blue. The sequence of events is rather easy to reconstruct. The DCI had a bad time with BOB, particularly on the size of R&D expenditures. The TSS proposal came to his attention thereafter and he seized upon it as a matter for discussion at the meeting. He apparently didn't give the proposal much thought in terms of its own merits or as it related to the over-all R&D program. Those present were obviously unprepared to discuss the subject and the comments made by HELMS and BISSELL, with a small contribution by WHITE, were strictly from the top of the head and, naturally, defensive. What disturbs me most is that by this kind of action the Director precludes sound and thorough consideration of a problem by his principal officers and denies himself the good judgment they may be capable of offering.
